

Governor's Actions to Balance the State Budget

March 12, 2001

Overview of actions to balance state budget

Process

- The Governor issued Executive Order 74 (2001) to fulfill his Constitutional duty to balance the state's budget. This included the withholding of funds for some state agencies and departments and a moratorium on new construction projects for buildings or renovations not under contract.
- A subsequent review of capital outlay projects found that \$393.0 million is not currently under contract. After the review, capital projects costing \$274.5 million were chosen for possible delay.
- Agencies submitted preliminary spending reduction proposals totaling \$373.9 million on March 2, 2001. After reviewing the proposals, the preliminary reduction targets were reduced to \$146.2 million.
- Since that time, the Governor, Governor's Office, the Secretary of Finance, and the Department of Planning and Budget have been reviewing the preliminary plans.
- Today, the Governor is announcing preliminary actions to balance the budget and address the projected \$421 million revenue shortfall.
- An appeals process has been established as a safety-valve to address necessary revisions, if any.

Actions to balance budget

Biennial Amount
\$ in millions

Amount required to balance state budget **\$421.0**

Capital outlay projects delayed **\$274.5**

Additional resources:

▪ VRS rate reductions as a result of overfunding	
✓ State employee rates	\$63.4
✓ Public school teacher rates	\$8.9
▪ Out-of-state prisoner revenue	\$5.0
▪ Debt service re-financing	\$3.0
▪ Uncommitted grant funds for private airports	<u>\$5.0</u>
<i>Subtotal</i>	\$85.3

Agency preliminary budget savings:

▪ Anticipated unspent balances	\$76.6
▪ Savings from nonessential vacant positions	\$8.8
▪ Improved efficiencies in business practices	\$6.5
▪ State grants to localities	\$25.5
▪ Greater use of nongeneral fund revenues	\$11.3
▪ Equipment savings	\$11.5
▪ Other administrative savings	<u>\$6.0</u>
<i>Subtotal</i>	\$146.2

Total savings identified **\$506.0**

Operating Budget Actions

Agency preliminary budget savings

- From 1997 to 2002, the Commonwealth's annual spending has increased by 42 percent.
- Agency preliminary budget reductions total \$146.2 million, or just over one-half percent (0.6%) of the state's general fund operating budget for the 2000-2002 biennium.
- Almost two-thirds of the reductions come from anticipated unspent balances (52.4 percent), vacancy and turnover in the state's workforce (6.0 percent) and improved efficiencies and administrative savings (8.6 percent).
- Essential state services in the areas of K-12 education, higher education, health and human resources, public safety, and transportation are protected from these reductions.
- 52 agencies with general fund appropriations are totally exempt from these reductions.

Appeals process for operating budget

An appeals process has been established for operating budget reductions to:

- Address critical needs or unintended consequences
- Address emergency situations
- Resolve unique problems or issues

------------------------	----------------------

Selected Examples of Operating Savings

Anticipated unspent balances

- **Revert FY 2000 & FY 2002 balances:** The Appropriation Act provides each year for mandatory reappropriation of prior year remaining fund balances for the Compensation Board. Currently, about \$17.5 million has been reappropriated to the Compensation Board in FY 2001 from FY 2000 year-end balances, and is available for reduction. The reversion of FY 2002 amounts assumes a four percent turnover and vacancy rate among the constitutional officers' offices. Total general fund savings: \$41.7 million.
- **Level fund Technology Innovation Centers:** The Innovative Technology Authority will continue funding its Technology Innovation Centers at current levels and delay establishing new centers in FY 2002. Total general fund savings: \$1.0 million.
- **Revert uncommitted funding in Virginia Resources Authority:** The 2000 Appropriation Act provide \$25 million from the general fund to the Department of Transportation for the Virginia Airports Revolving Loan Fund. These funds were subsequently transferred to the Virginia Resources Authority for this program, of which only \$23 million has been committed. Total general fund savings: \$2.0 million.

Savings from nonessential vacant positions

- **Defer hiring and use of vacancy savings:** The Department of Treasury has had several vacancies in both its Debt Management and Operations divisions. The positions were advertised several times and remained vacant longer than anticipated. As a result, the agency has generated additional savings. Treasury will also defer the hiring of several positions currently vacant and will reassign responsibilities on an interim basis to cover the workload. The agency will utilize overtime and temporary assistance as needed. Total general fund savings: \$99,120.
- **Capture personnel service efficiencies:** The Department of Human Resources Management will capture savings by delaying the hiring of five positions. Total general fund savings: \$28,684.

Improved efficiencies in businesses practices

- **Reduce printing costs:** The Department of Accounts will reduce its printing costs by implementing an on-line report viewing system. The department generates savings by printing fewer accounting reports for use within the agency. Total general fund savings: \$25,000.

- **Increase use of web-based publishing:** The Department of Corrections will utilize web-based publishing to create savings in the printing and mailing of documents and materials. Total general fund savings: \$46,080.
- **Centralize kit preparation:** The Department of General Services can reduce the cost of preparing laboratory kits and discontinue a vacant position at its Abingdon regional laboratory. The agency's Division of Consolidated Laboratory Services will centralize the preparation of laboratory kits it provides to customers in the Richmond laboratory. Total general fund savings: \$20,000.
- **Improve the efficiency of administrative support services:** The Department of Human Resource Management will achieve savings through the deferral and/or reduction of various administrative support services expenses such as the cost for storage space, supplies, and telecommunication services (cell phone and beepers). In addition, equipment needs are being analyzed to ensure only essential purchases. Total general fund savings: \$99,854.

State grants to localities

- **Defer local library construction grant funds yet to be committed:** The Library of Virginia will defer grants for local public library construction projects in 2002. All projects that were committed in 2001 will retain full funding. No projects have been committed for 2002. This action is consistent with the freeze on uncommitted construction projects. Total general fund savings: \$450,000.
- **Fund aid to localities through the "599" program based on current revenues:** The Department of Criminal Justice Services will modify the amount of "599" funding to be distributed to reflect the revised general fund revenue forecast in the program's formula, consistent with current law. The "599" program is a form of state revenue sharing to localities having police departments. The statutory formula for determining the amount of these grants is tied to revenue growth. Total general fund savings: \$10,266,510.

Greater use of nongeneral fund revenues

- **Supplant weatherization funds with nongeneral fund moneys:** The Department of Housing and Community Development will use oil overcharge moneys to supplant general fund moneys for the Weatherization Program. Total general fund savings: \$150,000.
- **Utilize nongeneral funds to pay for Commonwealth of Virginia Campaign expenses:** The Combined Virginia Campaign (CVC) will use nongeneral funds to support the program director's salary and fringes, as well as travel expenses. All other costs associated with this program are paid from special funds. This will permit management to assess the cost effectiveness of the entire program. Total general fund savings: \$146,530.

Equipment savings

- **Implement lease/finance program for procuring new vehicles:** The Department of State Police has traditionally purchased replacement vehicles with appropriated funds. Starting in FY 2002, it will utilize the Master Equipment Lease Program to acquire a portion of replacement vehicles. Total general fund savings: \$2.5 million.
- **Use lease-purchase program for fire fighting equipment:** The Department of Forestry will purchase fire-fighting equipment under the state's Master Equipment Lease Program. This will spread acquisition costs over the life of the equipment. Total general fund savings: \$453,164.

Other administrative savings

- **Reduce budget for out-of-state travel:** The Department of Forestry will reduce its travel spending. Total general fund savings: \$24,610.
- **Savings from reducing discretionary spending:** The Department of Planning and Budget will closely monitor all discretionary expenditures over the next four months to capture the targeted amount. Total general fund savings: \$4,959.
- **Capture administrative savings:** The Department of Criminal Justice Services will reduce overall agency expenses by reengineering agency processes to produce efficiencies and savings in purchases of supplies and equipment. The department will delay an internal agency automation project and reduce unnecessary travel expenses. Total general fund savings: \$244,152.

Capital Budget Actions

Overview of capital outlay actions

- Executive Order 74 (2001) froze capital projects not under contract as of February 24, 2001.
- A subsequent review of appropriated capital projects determined that \$393.0 million in general fund projects were current not under contract and were subject to the provisions of the Executive Order.
- Of the total amount not under contract, \$118.5 million involves projects relating to maintenance reserve, life safety code renovations, asbestos abatement, handicapped access, and critical public services. These are being released immediately.
- The net total subject to the on-going freeze is \$274.5 million.
- An appeals process has been established to address negative impacts associated with the delay of these projects.

General fund capital outlay actions

Dollars in Millions

Capital outlay dollars not under contract **\$393.0**

After preliminary review, funds were restored funds for:

- | | |
|---|--------|
| • Maintenance Reserve (all first year & ½ second) | \$52.0 |
| • Life Safety Code renovations | \$38.7 |
| • Asbestos abatement | \$5.3 |
| • Handicapped accessibility modifications | \$2.9 |
| • Other critical projects | \$19.6 |
| ✓ Schools for Deaf & Blind | |
| ✓ Woodrow Wilson Rehabilitation Center | |
| ✓ Hampton Roads Veterans Cemetery | |
| ✓ Cheatham Annex clean-up | |
| ✓ Correctional security & housing | |
| ✓ Contingency for emergency repairs | |

Total amount restored **\$118.5**

Total amount delayed **\$274.5**

Appeals process

An Appeals process has been established to:

- Address critical priorities of institutions of higher education and state agencies
- Complete architectural and engineering work in order to not delay critical projects
- Maximize use of private or nongeneral funds
- Resolve unique problems or issues

*Actions involving
State Grants to Localities*

Overview of actions involving state grants to localities

- Of the \$146.2 million in preliminary agency budget reductions, \$25.5 million or 17.4 percent involve state grants to localities.
- Localities will benefit from \$94.3 million in savings from reduced rates in FY 2002 for contributions to the Virginia Retirement System. This amount will more than offset the planned reductions in state grants to localities discussed here.
- These reductions represent far less than one percent (0.15 percent) of the total \$17.6 billion for state grants to localities in the operating budget for the 2000-2002 biennium.
- Grants to localities represent 36 percent of the state's total operating budget (all funds) for the biennium.
- Over 40 percent of the reduction in state grants to localities is attributable to a recalculation of revenue sharing payments under HB 599. These payments are tied to revenue growth and, as such, the reduction is consistent with current law. Revised HB 599 payments to localities will total \$355.1 for the biennium.
- Outside of ABC profits and funding under the 599 program, no other formula-driven grants will be affected. Some agencies will be reducing competitive grant programs.
- On Friday, the Department of Education notified localities of the amounts of state funding for local school divisions they can expect for the remainder of the biennium.

Preliminary agency budget savings

State grants to localities

Biennial Amount

Commerce and Trade

Department of Housing and Community Development

Reduce funding for the Industrial Site Development program	\$6,590,000
Reduce funding of regional competitiveness efforts	\$1,140,800
